SUMMARY

I'm a full-stack software engineer with 7 years of experience in C#.NET, TypeScript/React, Azure, and SQL Server. Most of my work is building and modernizing production APIs, databases, and front ends. I care about maintainability, which usually means test coverage, documentation, and build tooling.

PROFESSIONAL EXPERIENCE

Pangaea Information Technologies, Software Engineer II

Jan 2019 – Present

TMPT – Training Support Systems-Enterprise Master Planning Tool: Enterprise planning system for U.S. Army range and training management, supporting 350+ active users worldwide.

- Led the platform migration from .NET Framework 4.8 to .NET 10 and Entity Framework 6 to EF Core, accelerating it with Claude Code and verifying changes with unit tests and user acceptance testing.
- Designed, built, and maintained OData APIs over Entity Framework and SQL Server.
- Enforced policy-based access control (PBAC) across Army-wide project data.

CEC Taking Stock Online: Public data platform unifying pollutant records from ~40,000 North American facilities into an interactive query and mapping tool.

- Led the migration off NancyFX to ASP.NET MVC, rewrote bootstrapping, routing, and exception filtering as three reviewable phases using AI-assisted tooling with unit-test gates.
- Audited landing-page performance with Chrome DevTools traces and implemented fixes that cut image payload 60% (4.7 MB to 1.9 MB) and Largest Contentful Paint 58% (17.8s to 7.4s).
- Onboarded and mentored a part-time developer over 3 years, scoped their work into reviewable tasks and performed code reviews on their pull requests.

FlowKaizen Performance Tools: Multi-tenant SaaS platform visualizing patient and work flow in hospitals.

- Built the platform's serverless REST API in TypeScript on Azure Functions backed by Cosmos DB.
- Supported multi-tenant data access for hospital clients and tuned indexes across all containers.
- Defined the platform's Azure infrastructure as code in Terraform, replacing manual portal provisioning with version-controlled environments.

VOLUNTEER EXPERIENCE

Code with Aloha

Jan 2022 – Present

Lead Organizer (Jan 2026 – Present) | Volunteer Developer (Jan 2022 – Jan 2026)

- Promoted to Lead Organizer after 4 years as a Volunteer Developer and currently direct 20 volunteers.

HIERR Survey Tool: Civic engagement platform for the Hawai'i Office of Planning & Sustainable Development (OPSD).

- Led design and deployment of the survey tool, directed a volunteer team of 7 and partnered directly with state agency stakeholders to align the platform with OPSD goals.
- Built the application wrapping the Polis survey tool with Next.js, React, TypeScript, Prisma, and Tailwind CSS, deployed across 20+ community workshops.
- Used Leaflet and Esri geocoding services to build the census tract map with zip code selection and address search.

Toastmasters International – Nu'uuanu Club

June 2024 – Present

Club President (June 2026 – Present) | Member (June 2024 – June 2026)

- Elected Club President in 2026 after 2 years as a member. Run meetings, coordinate officers, and grow membership.

EDUCATION

University of Illinois at Chicago – B.Sc., Computer Science (Dec 2018) | B.Sc., Physics (May 2015)

CERTIFICATIONS

CompTIA Security+ (SY0-601) | Microsoft Certified: Azure Developer Associate

Awards: Hawaii Annual Code Challenge, 1st Place 2024 (Aloha Birds) and 4th Place 2023 (Marine Debris)

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks and Libraries: .NET 10, .NET Framework 4.8, ASP.NET MVC, Entity Framework Core / EF6, OData, React, Next.js, Node.js, tRPC, Prisma, Tailwind CSS, NextAuth, Recharts

Cloud and Data: Azure Functions, App Service, Static Web Apps, Blob Storage, Cosmos DB, SQL Server, Terraform, OpenTelemetry, OpenAPI / Swagger

Testing: NUnit, Jest, Vitest, QUnit, Playwright

Tooling and Platforms: GitHub Actions, Docker, Vite, ESLint / Prettier, Git, Chrome DevTools, Claude Code, Linux, Vim
